NOTES TO FINANCIAL STATEMENTS

1. Summary of Significant Accounting Policies

A. Accounting Practices

The financial statements of Mortgage Guaranty Insurance Corporation are presented on the basis of accounting practices prescribed or permitted by the Office of the Commissioner of Insurance of the State of Wisconsin (“OCI”). The OCI recognizes only statutory accounting practices prescribed or permitted by the State of Wisconsin for determining and reporting the financial condition and results of operations of an insurance company, for determining its solvency under the Wisconsin insurance law. The National Association of Insurance Commissioners’ (“NAIC”) *Accounting Practices and Procedures Manual* (“NAIC SAP”) has been adopted as a component of prescribed practices by the OCI. The OCI has adopted certain prescribed accounting practices that differ from those found in NAIC SAP. Specifically, Wisconsin domiciled companies record changes in the contingency loss reserves through the income statement as an underwriting deduction. In NAIC SAP, changes in the contingency loss reserves are recorded directly to unassigned surplus. In addition, the OCI has the right to permit specific practices that deviate from prescribed practices. Under a permitted practice effective September 30, 2012, the OCI had approved MGIC to report its net deferred tax asset as an admitted asset in an amount not to exceed 10% of adjusted surplus as regards policyholders, notwithstanding any contrary provisions of Statement of Statutory Accounting Principles No. 101 (“SSAP No. 101”). Deferred tax assets of \$138 million were included in MGIC’s statutory capital at December 31, 2014. Due to the deferred tax asset valuation allowance reversal as of September 30, 2015, MGIC no longer relies on the permitted practice and the deferred tax asset is admitted according to the stated provisions of SSAP No. 101. Under the stated provisions of SSAP No. 101, the admitted net deferred tax asset is 15% of adjusted surplus as regards policyholders. Net deferred tax assets of \$205 million were included in MGIC’s statutory capital as of December 31, 2015. A reconciliation of net income (loss) and capital and surplus between the NAIC SAP and practices permitted by the OCI is shown below:

B. Use of Estimates in the Preparation of the Financial Statements

The preparation of financial statements in conformity with statutory accounting principles requires management to make estimates and assumptions that affect the reported amounts of assets and liabilities and disclosure of contingent assets and liabilities at the date of the financial statements and the reported amounts of revenues and expenses during the reporting period. Actual results could differ from those estimates.

We have established an estimated allowance for uncollectible premiums which is based on analysis of historic trends. As of December 31, 2015 the allowance for uncollectible premiums is approximately \$1.0 million. The “Uncollected premiums and agents’ balances in the course of collection” are reported net of the allowance on Page 2 of this statement.

C. Accounting Policies

- (1) Short-term investments are stated at either fair value (money market funds) or amortized cost, with amortization using the modified scientific method (bonds).
- (2) Generally, bonds are stated at amortized cost and are amortized using the modified scientific method.
- (3) Common Stocks are carried at cost, amounts that approximate fair value, with the exception of investments in stocks of subsidiaries that are carried on the equity basis (see 1.C.7.).
- (4) We own no preferred stock.
- (5) We own no mortgage loans.
- (6) Loan-backed securities are valued using the retrospective method and stated at amortized cost or fair value in accordance with their NAIC designation.
- (7) We own 100% of the common stock of MGIC Reinsurance Corporation of Wisconsin (“MRCW”), MGIC Credit Assurance Corporation (“MCAC”), MGIC Assurance Corporation (“MAC”), MGIC Reinsurance Corporation of Vermont (“MRCV”), MGIC Indemnity Corporation (“MIC”), MGIC Australia Pty Limited (“MGIC Australia”) and MIC Reinsurance Corporation (“MICRE”), property and casualty insurance companies. These assets are valued on the equity basis.
- (8) We have a 100% interest in MGIC Mortgage and Consumer Asset I LLC (“MMCA I”). This asset is valued on the equity basis.
- (9) We own no derivative instruments.
- (10) We utilize anticipated investment income as a factor in the premium deficiency calculation performed in accordance with SSAP No. 58, Mortgage Guaranty Insurance.
- (11) Reserves are established for reported insurance losses and loss adjustment expenses based on when we receive notices of default on insured mortgage loans. We consider a loan in default when it is two or more payments past due. Consistent with industry standards for mortgage insurers, we do not establish loss reserves for future claims on insured loans which are not currently in default. Loss reserves are established by estimating the number of loans in our inventory of delinquent loans that will result in a claim payment, which is referred to as the claim rate, and further estimating the amount of the claim payment, which is referred to as claim severity. Our loss estimates are established based upon historical experience, including rescission and loan modification activity. Adjustments to reserve estimates are reflected in the financial statements in the years in which the adjustments are made. The liability for reinsurance assumed is based on information provided by the ceding companies.

Reserves are also established for estimated losses from defaults occurring prior to the close of an accounting period on notices of default not yet reported to us. These incurred but not reported (“IBNR”) reserves are also established using estimated claim rates and claim severities.

Reserves also provide for the estimated costs of settling claims, including legal and other expenses and general expenses of administering the claims settlement process. Reserves are also ceded to reinsurers under our reinsurance agreements.

Estimation of losses is inherently judgmental. The conditions that affect the claim rate and claim severity include the current and future state of the domestic economy, including unemployment, and the current and future strength of local housing markets. The actual amount of the claim payments may be substantially different than our loss reserve estimates. Our estimates could be adversely affected by several factors, including a deterioration of regional or national economic conditions, including unemployment, leading to a reduction in borrowers’ income and thus their ability to make mortgage payments, and a drop in housing values which may affect borrower willingness to continue to make mortgage payments when the value of the home is below the mortgage balance. Changes to our estimates could result in a material impact to our results of operations and capital position, even in a stable economic environment.

- (12) In 2015, we changed our capitalization policy as part of a routine assessment in establishing a cost threshold and useful lives for the capitalization of assets.
- (13) We do not have any pharmaceutical rebate receivables.

ANNUAL STATEMENT FOR THE YEAR 2015 OF THE MORTGAGE GUARANTY INSURANCE CORPORATION

- D. Loan-Backed Securities
- (1) Prepayment assumptions for mortgage-backed/loan-backed and structured securities were obtained from a major third party provider or internal estimates.
- (2) Not applicable
- (3) Not applicable
- (4) All impaired securities for which an other-than-temporary impairment has not been recognized in earnings as a realized loss:
- a. The aggregate amount of unrealized losses:
- |    |                     |               |
|----|---------------------|---------------|
| 1. | Less than 12 months | \$ 2,727,007  |
| 2. | 12 months or longer | \$ 10,535,883 |
- b. The aggregate related fair value of securities with unrealized losses:
- |    |                     |               |
|----|---------------------|---------------|
| 1. | Less than 12 months | \$258,970,848 |
| 2. | 12 months or longer | \$331,558,198 |
- (5) All loan-backed and structured securities in an unrealized loss position were reviewed for potential other-than-temporary impairments. In evaluating whether a decline in fair value is other-than-temporary, we consider several factors including, but not limited to:
- our intent to sell the security or whether it is more likely than not that we will be required to sell the security before recovery;
  - extent and duration of the decline;
  - failure of the issuer to make scheduled interest or principal payments;
  - change in rating below investment grade; and
  - adverse conditions specifically related to the security, an industry, or a geographic area.

The unrealized losses in all categories of our investments at December 31, 2015 were primarily caused by the difference in interest rates at December 31, 2015 compared to interest rates at the time of purchase. We have the intent and ability to hold these securities long enough to recover our cost basis.

- E. Repurchase Agreements - We do not own any repurchase agreements.
- F. Real Estate - Our investments in real estate are for either our own use or as settlements of claims. There were no impairment losses on real estate owned for our use or as settlement of claims.
- G. Low-income housing tax credits (“LIHTC”) – We do not hold any low income federal housing tax credits.
- H. Restricted Assets

The method of allocation between the companies is subject to written agreement. Allocation is based upon separate return calculations with current credit for losses that were utilized or could have been utilized by the MGIC Group. Tax and loss bonds are assumed to be purchased and held to the extent allowable. Intercompany tax balances are settled quarterly.

G. The Internal Revenue Service ("IRS") completed examinations of our federal income tax returns for the years 2000 through 2007 and issued proposed assessments for taxes, interest and penalties related to our treatment of the flow-through income and loss from an investment in a portfolio of residual interests of Real Estate Mortgage Investment Conduits ("REMICs"). The IRS indicated that it did not believe that, for various reasons, we had established sufficient tax basis in the REMIC residual interests to deduct the losses from taxable income. We appealed these assessments within the IRS and in August 2010, we reached a tentative settlement agreement with the IRS which was not finalized.

On September 10, 2014, we received Notices of Deficiency (commonly referred to as "90 day letters") covering the 2000-2007 tax years. The Notices of Deficiency reflect taxes and penalties related to the REMIC matters of \$197.5 million and at December 31, 2015, there would also be interest related to these matters of approximately \$182.9 million. In 2007, we made a payment of \$65.2 million to the United States Department of the Treasury which will reduce any amounts we would ultimately owe. The Notices of Deficiency also reflect additional amounts due of \$261.4 million, which are primarily associated with the disallowance of the carryback of the 2009 net operating loss to the 2004-2007 tax years. We believe the IRS included the carryback adjustments as a precaution to keep open the statute of limitations on collection of the tax that was refunded when this loss was carried back, and not because the IRS actually intends to disallow the carryback permanently.

ANNUAL STATEMENT FOR THE YEAR 2015 OF THE MORTGAGE GUARANTY INSURANCE CORPORATION

We filed a petition with the U.S. Tax Court contesting most of the IRS' proposed adjustments reflected in the Notices of Deficiency and the IRS has filed an answer to our petition which continues to assert their claim. Litigation to resolve our dispute with the IRS could be lengthy and costly in terms of legal fees and related expenses. We can provide no assurance regarding the outcome of any such litigation or whether a compromised settlement with the IRS will ultimately be reached and finalized. Depending on the outcome of this matter, additional state income taxes and state interest may become due when a final resolution is reached. As of December 31, 2015, those state taxes and interest would approximate \$48.8 million. In addition, there could also be state tax penalties. Our total amount of unrecognized tax benefits as of December 31, 2015 is \$107.1 million, which represents the tax benefits generated by the REMIC portfolio included in our tax returns that we have not taken benefit for in our financial statements, including any related interest. We continue to believe that our previously recorded tax provisions and liabilities are appropriate. However, we would need to make appropriate adjustments, which could be material, to our tax provision and liabilities if our view of the probability of success in this matter changes, and the ultimate resolution of this matter could have a material negative impact on our effective tax rate, results of operations, cash flows, available assets and statutory capital. In this regard, see Note 13(6).

- (9) The amount of the accumulated benefit obligation for Pension Benefit Plans was \$338,450,217 for the current year and \$336,440,416 for the prior year.
- (10) For measurement purposes a 7.0% health care trend rate was used for pre-65 benefits for 2015. In 2016, the rate is assumed to be 7.0%, decreasing to 5.0% by 2020 and remaining at this level beyond.
- (11) Assumed health care cost trend rates have an effect on the amounts reported for the health care plan. A one-percentage point change in assumed health care cost trend rates would have the following effects:

|                                                         | 1-Percentage<br>Point Increase | 1-Percentage<br>Point Decrease |

B. The Pension Benefit plan has implemented a strategy to reduce risk through the use of a targeted funded ratio. The liability driven component is key to the asset allocation. The liability driven component seeks to align the duration of the fixed income asset allocation with the expected duration of the plan liabilities or benefit payments. Overall asset allocation is dynamic and specifies target allocation weights and ranges based on the funded status.

An improvement in funding status results in the de-risking of the portfolio, allocating more funds to fixed income and less to equity. A decline in funding status would result in a higher allocation to equity. The maximum equity allocation is 40%.

The equity investments utilize combinations of mutual funds, ETFs, and pooled equity account structures. Within the equity investments; return seeking growth investments allocate to global quality growth and global low volatility investments and return seeking bridge investments allocate to enduring asset investments and durable company investments.

The fixed income objective is to preserve capital and to provide monthly cash flows for the payment of plan liabilities. Fixed income investments can include government, government agencies, corporate, mortgage backed, asset backed, municipal securities, and other classes of bonds. The duration of the fixed income portfolio has an objective of being within one year of the duration of the accumulated benefit obligation. The fixed income investments have an objective of a weighted average credit of A3/A-/A- by Moody's, S&P, and Fitch, respectively.

The Postretirement Benefit Plan portfolio is designed to achieve the following objectives over each market cycle and for at least 5 years:

- Total return should exceed growth in the Consumer Price Index by 5.75% annually
- Achieve competitive investment results

ANNUAL STATEMENT FOR THE YEAR 2015 OF THE MORTGAGE GUARANTY INSURANCE CORPORATION

The primary focus in developing asset allocation ranges for the portfolio is the assessment of the portfolio's investment objectives and the level of risk that is acceptable to obtain those objectives. To achieve these goals the minimum and maximum allocation ranges for fixed income securities and equity securities are:

|                      | <u>Minimum</u> | <u>Maximum</u> |
|----------------------|----------------|----------------|
| Equities (long only) | 70%            | 100%           |
| Real estate          | 0%             | 15%            |
| Commodities          | 0%             | 10%            |
| Fixed income/Cash    | 0%             | 10%            |

Given the long term nature of the Postretirement Benefit Plan portfolio and the lack of any immediate need for significant cash flow, it is anticipated that the equity investments will consist of growth stocks and will typically be at the higher end of the allocation ranges above.

The Postretirement Benefit Plan portfolio includes investments in international oriented funds as indicated below. The investment in international oriented funds is limited to a maximum of 30% of the equity range. The current international allocation is invested in two mutual funds with 4% of the equity allocation in a fund which has the objective of investments primarily in equity securities of emerging markets countries, and 21% of the equity allocation in a fund investing in securities of companies based outside the United States. It invests in companies primarily based in Europe and the Pacific Basin, and primarily in equity investments although it may also hold cash, money market instruments, and fixed income securities depending on market conditions. The year-end asset allocations of the plans are as follows:

| <u>Allocation of Plan Assets at year end</u> | <u>Pension Benefits</u> |                   | <u>Postretirement Benefits</u> |                   |

C. In accordance with fair value guidance, we applied the following fair value hierarchy in order to measure fair value of our benefit plan assets:

Level 1 – Quoted prices for identical instruments in active markets that we have the ability to access. Financial assets utilizing Level 1 inputs include equity securities, mutual funds, money market funds, certain U.S. Treasury securities and ETF’s.

Level 2 – Quoted prices for similar instruments in active markets; quoted prices for identical or similar instruments in markets that are not active; and inputs, other than quoted prices, that are observable in the marketplace for the financial instrument. The observable inputs are used in valuation models to calculate the fair value of the financial instruments. Financial assets utilizing Level 2 inputs include certain municipal, corporate and foreign bonds, obligations of U.S. government corporations and agencies, and pooled equity accounts.

Level 3 – Valuations derived from valuation techniques in which one or more significant inputs or value drivers are unobservable. Level 3 inputs reflect our own assumptions about the assumptions a market participant would use in pricing an asset or liability. There are no securities that utilize Level 3 inputs.

To determine the fair value of securities in Level 1 and Level 2 of the fair value hierarchy, independent pricing sources have been utilized. One price is provided per security based on observable market data. To ensure securities are appropriately classified in the fair value hierarchy, we review the pricing techniques and methodologies of the independent pricing sources and believe that their policies adequately consider market activity, either based on specific transactions for the issue valued or based on modeling of securities with similar credit quality, duration, yield and structure that were recently traded. A variety of inputs are utilized by the independent pricing sources including benchmark yields, reported trades, non-binding broker/dealer quotes, issuer spreads, two sided markets, benchmark securities, bids, offers and reference data including market research publications. Inputs may be weighted differently for any security, and not all inputs are used for each security evaluation. Market indicators, industry and economic events are also considered. This information is evaluated using a multidimensional pricing model. In addition, on a quarterly basis, we perform quality controls over values received from the pricing source (the “Trustee”) which include comparing values to other independent pricing sources. In addition, we review annually the Trustee’s auditor’s report on internal controls in order to determine that their controls around valuing securities are operating effectively. We have not made any adjustments to the prices obtained from the independent sources.

In selecting the expected long-term rate of return on assets, we considered the average rate of earnings expected on the classes of funds invested or to be invested to provide for the benefits of these plans. 13. Capital and Surplus, Dividend Restrictions and Quasi-Reorganizations

- (1) As of December 31, 2015, we had 100,000 shares of \$50 par value common capital stock authorized and issued, and 41,085 shares outstanding.
- (2) We have no preferred stock outstanding.
- (3) The maximum amount of dividends which can be paid by State of Wisconsin insurance companies to shareholders is subject to restrictions relating to statutory surplus and income. In 2016 we cannot pay any dividends without approval of the OCI.
- (4) We paid no dividends in 2015.
- (5) Within the limitations of (3) above, there are no restrictions placed on the portion of our profits that may be paid as ordinary dividends to shareholders.
- (6) Substantially all of our insurance written since 2008 has been for loans purchased by Fannie Mae and Freddie Mac (the "GSEs"). The GSEs each revised its private mortgage insurer eligibility requirements ("PMIERs") effective December 31, 2015. The financial requirements of the PMIERs require a mortgage insurer’s “Available Assets” (generally only the most liquid assets of an insurer) to equal or exceed its “Minimum Required Assets” (which are based on an insurer’s book and are calculated from tables of factors with several risk dimensions and are subject to a floor amount).

Based on our interpretation of the PMIERs, as of December 31, 2015, our Available Assets are in excess of our Minimum Required Assets; and we are in compliance with the financial requirements of the PMIERs and eligible to insure loans purchased by the GSEs.

ANNUAL STATEMENT FOR THE YEAR 2015 OF THE MORTGAGE GUARANTY INSURANCE CORPORATION

The insurance laws of 16 jurisdictions, including Wisconsin, our domiciliary state, require a mortgage insurer to maintain a minimum amount of statutory capital relative to the risk in force (or a similar measure) in order for the mortgage insurer to continue to write new business. We refer to these requirements as the “State Capital Requirements” and, together with the GSE Financial Requirements, the “Financial Requirements.” While they vary among jurisdictions, the most common State Capital Requirements allow for a maximum risk-to-capital ratio of 25 to 1. A risk-to-capital ratio will increase if (i) the percentage decrease in capital exceeds the percentage decrease in insured risk, or (ii) the percentage increase in capital is less than the percentage increase in insured risk. Wisconsin does not regulate capital by using a risk-to-capital measure but instead requires a minimum policyholder position (“MPP”). The “policyholder position” of a mortgage insurer is its net worth or surplus, contingency reserve and a portion of the reserves for unearned premiums.

At December 31, 2015, our risk-to-capital ratio was 12.1 to 1, below the maximum allowed by the jurisdictions with State Capital Requirements and our policyholder position was \$1.2 billion above the required MPP of \$1.1 billion. In calculating our risk-to-capital ratio and MPP, we are allowed full credit for the risk ceded under our reinsurance transaction with a group of unaffiliated reinsurers. It is possible that under the revised State Capital Requirements discussed below, we will not be allowed full credit for the risk ceded to the reinsurers. If we are not allowed an agreed level of credit under either the State Capital Requirements or the PMIERS, we may terminate the reinsurance agreement, without penalty. At this time, we expect to continue to comply with the current State Capital Requirements.

The NAIC previously announced that it plans to revise the minimum capital and surplus requirements for mortgage insurers that are provided for in its Mortgage Guaranty Insurance Model Act. A working group of state regulators is drafting the revisions, although no date has been established by which the NAIC must propose revisions to such requirements. Depending on the scope of revisions made by the NAIC, we may be prevented from writing new business in the jurisdictions adopting such revisions.

If we fail to meet the State Capital Requirements of Wisconsin and are unable to obtain a waiver of them from the OCI, we could be prevented from writing new business in all jurisdictions. If we fail to meet the State Capital Requirements of a jurisdiction other than Wisconsin and are unable to obtain a waiver of them, we could be prevented from writing new business in that particular jurisdiction. It is possible that regulatory action by one or more jurisdictions, including those that do not have specific State Capital Requirements, may prevent us from continuing to write new insurance in such jurisdictions. If we are unable to write business in all jurisdictions, lenders may be unwilling to procure insurance from us anywhere. In addition, a lender’s assessment of the future ability of our insurance operations to meet the State Capital Requirements or the PMIERS may affect its willingness to procure insurance from us. A possible future failure by us to meet the State Capital Requirements or the PMIERS will not necessarily mean that we lack sufficient resources to pay claims on our insurance liabilities. We believe we have sufficient claims paying resources to meet our claim obligations on our insurance in force on a timely basis.

- (7) We have not made any advances to surplus.
- (8) We hold no stock for special purposes.
- (9) We have no special surplus funds.
- (10) The portion of unassigned funds (surplus) represented or reduced by cumulative unrealized gains and losses is (\$792,233,636).
- (11) We have no surplus notes.
- (12) We have not undergone a quasi-reorganization.
- (13) We have not undergone a quasi-reorganization.

14. Liabilities, Contingencies and Assessments

- A. We have agreed to provide funds to our affiliate, MIC, in the form of an agreement to provide liquidity for claim payments in one of the states in which it had written insurance prior to March 1985. As the parent of MGIC Australia, we had agreed to provide capital to MGIC Australia sufficient to satisfy the criteria established by the Australian Prudential Regulation Authority (“APRA”), in the form of a letter agreement from us to APRA on terms and conditions customarily required by APRA. In 2015, we settled all of our remaining risk in force in Australia, and the letter agreement was withdrawn.
- B. Assessments - not applicable
- C. Gain Contingencies - not applicable
- D. Claims Related Extra Contractual Obligation and Bad Faith Losses Stemming from Lawsuits - not applicable
- E. Product Warranties - not applicable
- F. Joint and Several Liabilities
- G. All Other Contingencies

Before paying a claim, we review the loan and servicing files to determine the appropriateness of the claim amount. All of our insurance policies provide that we can reduce or deny a claim if the servicer did not comply with its obligations under our insurance policy, including the requirement to mitigate our loss by performing reasonable loss mitigation efforts or, for example, diligently pursuing a foreclosure or bankruptcy relief in a timely manner. We call such reduction of claims submitted to us “curtailments.” In each of 2014 and 2015, curtailments reduced our average claim paid by approximately 6.7%. After we pay a claim, servicers and insureds sometimes object to our curtailments and other adjustments. We review these objections if they are sent to us within 90 days after the claim was paid.

When reviewing the loan file associated with a claim, we may determine that we have the right to rescind coverage on the loan. (We refer to insurance rescissions and denials of claims collectively as “rescissions” and variations of that term.) In recent quarters, approximately 5% of claims received in a quarter have been resolved by rescissions, down from the peak of approximately 28% in the first half of 2009. Our loss reserving methodology incorporates our estimates of future rescissions and reversals of rescissions. A variance between ultimate actual rescission and reversal rates and our estimates, as a result of the outcome of litigation, settlements or other factors, could materially affect our losses.

If the insured disputes our right to rescind coverage, we generally engage in discussions in an attempt to settle the dispute. As part of those discussions, we may voluntarily suspend rescissions we believe may be part of a settlement. Certain settlements require GSE approval. The GSEs consented to settlement agreements we entered into with Countrywide Home Loans, Inc. (“CHL”) and its affiliate, Bank of America, N.A., as successor to Countrywide Home Loans Servicing LP, but there is no guarantee they will approve others. We have reached and implemented settlement agreements that do not require GSE approval, but they have not been material in the aggregate.

If we are unable to reach a settlement, the outcome of a dispute ultimately would be determined by legal proceedings. Under our policies in effect prior to October 1, 2014, legal proceedings disputing our right to rescind coverage may be brought up to three years after the lender has obtained title to the property (typically through a foreclosure) or the property was sold in a sale that we approved, whichever is applicable, and under our master policy effective October 1, 2014, such proceedings may be brought up to two years from the date of the notice of rescission. In a few jurisdictions there is a longer time to bring such proceedings.

Until a liability associated with a settlement agreement or litigation becomes probable and can be reasonably estimated, we consider our claim payment or rescission resolved for financial reporting purposes even though discussions and legal proceedings may have been initiated and are ongoing. Under SSAP 5R, an estimated loss from such discussions and proceedings is accrued for only if we determine that the loss is probable and can be reasonably estimated. The estimated impact that we have recorded is our best estimate of our loss from these matters. If we are not able to implement settlements we consider probable, we intend to defend ourselves vigorously against any related legal proceedings.

In addition to the probable settlements for which we have recorded a loss, we are involved in other discussions and/or proceedings with insureds with respect to our claims paying practices. In addition, holders of loans covered by our previously implemented settlement agreement with CHL that did not consent to that agreement (approximately 11% of the dollar amount of exposure under that agreement) may bring legal proceedings against us with respect to such loans. Although it is reasonably possible that when these matters are resolved we will not prevail in all cases, we are unable to make a reasonable estimate or range of estimates of the potential liability. We estimate the maximum exposure associated with matters where a loss is reasonably possible to be approximately \$327 million, although we believe we will ultimately resolve these matters for significantly less than this amount. This estimate includes the maximum exposure for losses that we have determined are probable in excess of the provision we have recorded for such losses.

The estimates of our maximum exposure referred to above do not include interest or consequential or exemplary damages.

ANNUAL STATEMENT FOR THE YEAR 2015 OF THE MORTGAGE GUARANTY INSURANCE CORPORATION

Mortgage insurers, us included, have been involved in litigation alleging violations of the anti-referral fee provisions of the Real Estate Settlement Procedures Act, which is commonly known as RESPA, and the notice provisions of the Fair Credit Reporting Act, which is commonly known as FCRA. Our settlement of class action litigation against us under RESPA became final in October 2003. We settled the named plaintiffs’ claims in litigation against us under FCRA in December 2004, following denial of class certification in June 2004. Since December 2006, class action litigation has been brought against a number of large lenders alleging that their captive mortgage reinsurance arrangements violated RESPA. Beginning in December 2011, we, together with various mortgage lenders and other mortgage insurers, were named as a defendant in twelve lawsuits, alleged to be class actions, filed in various U.S. District Courts. The complaints in all of the cases alleged various causes of action related to the captive mortgage reinsurance arrangements of the mortgage lenders, including that the lenders’ captive reinsurers received excessive premiums in relation to the risk assumed by those captives, thereby violating RESPA. As of the end of the first quarter of 2015, we had been dismissed from all twelve cases. There can be no assurance that we will not be subject to further litigation under RESPA (or FCRA) or that the outcome of any such litigation would not have a material adverse effect on us.

In 2013, we entered into a settlement with the Consumer Financial Protection Bureau (“CFPB”) that resolved a federal investigation of our participation in captive reinsurance arrangements without the CFPB or the court making any findings of wrongdoing. As part of the settlement, we agreed that we would not enter into any new captive reinsurance agreement or reinsure any new loans under any existing captive reinsurance agreement for a period of ten years. We had voluntarily suspended most of our captive arrangements in 2008 in response to market conditions and GSE requests. In connection with the settlement, we paid a civil penalty of \$2.65 million and the court issued an injunction prohibiting us from violating any provisions of RESPA.

In 2015, we executed a Consent Order with the Minnesota Department of Commerce that resolved that department’s investigation of captive reinsurance matters without making any findings of wrongdoing. The Consent Order provided, among other things, that we are prohibited from entering into any new captive reinsurance agreement or reinsuring any new loans under any existing captive reinsurance agreement for a period of ten years.

Various regulators, including the CFPB, state insurance commissioners and state attorneys general may bring other actions seeking various forms of relief in connection with alleged violations of RESPA. The insurance law provisions of many states prohibit paying for the referral of insurance business and provide various mechanisms to enforce this prohibition. While we believe our practices are in conformity with applicable laws and regulations, it is not possible to predict the eventual scope, duration or outcome of any such reviews or investigations nor is it possible to predict their effect on us or the mortgage insurance industry.

We are subject to comprehensive, detailed regulation by state insurance departments. These regulations are principally designed for the protection of our insured policyholders, rather than for the benefit of investors. Although their scope varies, state insurance laws generally grant broad supervisory powers to agencies or officials to examine insurance companies and enforce rules or exercise discretion affecting almost every significant aspect of the insurance business. State insurance regulatory authorities could take actions, including changes in capital requirements, that could have a material adverse effect on us. In addition, the CFPB may issue additional rules or regulations, which may materially affect our business.

In December 2013, the U.S. Treasury Department’s Federal Insurance Office released a report that calls for federal standards and oversight for mortgage insurers to be developed and implemented. It is uncertain what form the standards and oversight will take and when they will become effective.

In addition to the matters described above, we are involved in other legal proceedings in the ordinary course of business. In our opinion, based on the facts known at this time, the ultimate resolution of these ordinary course legal proceedings will not have a material adverse effect on our financial position or results of operations.

See Note 9.G. for a description of federal income tax contingencies.

15. Leases
- A. Lessee Operating Leases
- (1) We lease certain office space, data processing equipment and autos under operating leases that expire during the next seven years. Generally, all rental payments are fixed. Total rental expense under operating leases was \$2.1 million and \$2.7 million for 2015 and 2014, respectively.

(2) At January 1, 2016, the minimum aggregate operating lease commitments outstanding for all years in total, as well as for years 2016 through 2020, are as follows:
- | Year ending<br>December 31 | Operating Leases |
|----------------------------|------------------|
| 1. 2016                    | \$ 741,730       |

20. Fair Value Measurement
- A. Assets and Liabilities Measured and Reported at Fair Value
- (1) Fair Value Measurements at Reporting Date

We applied the following fair value hierarchy in order to measure fair value for assets and liabilities:

Level 1 – Quoted prices for identical instruments in active markets that we can access.

Level 2 – Quoted prices for similar instruments in active markets; quoted prices for identical or similar instruments in markets that are not active; and inputs, other than quoted prices, that are observable in the marketplace for the financial instrument. The observable inputs are used in valuation models to calculate the fair value of the financial instruments.

Level 3 – Valuations derived from valuation techniques in which one or more significant inputs or value drivers are unobservable. Level 3 inputs reflect our own assumptions about the assumptions a market participant would use in pricing an asset or liability.

As of December 31, 2015, we had no assets and liabilities measured and reported at fair value in Level 1 or 2 and no liabilities measured and reported in Level 3. Assets utilizing Level 3 inputs include real estate acquired through claim settlement.

Fair value measurements at reporting date:

At the end of each reporting period, we evaluate whether or not any event has occurred or circumstances have changed that would cause a security that is measured and reported at fair value to be transferred between Levels 1 and 2. Through December 31, 2015, there were no transfers between Levels 1 and 2.

- (3) Policy on Transfers Into and Out of Level 3  
At the end of each reporting period, we evaluate whether or not any event has occurred or circumstances have changed that would cause a security to be transferred into or out of Level 3. During 2015, there were no transfers into or out of Level 3.
- (4) Inputs and Techniques Used for Level 2 and 3 Fair Values  
We have no financial assets or liabilities measured at fair value in the Level 2 or Level 3 categories at December 31, 2015. Our non-financial assets that are classified as Level 3 securities consist of real estate acquired through claim settlement that is fair valued at the lower of our acquisition cost or a percentage of appraised value. The percentage applied to appraised value is based upon our historical sales experience adjusted for current trends.

To determine the fair value of financial instruments in Level 1 and Level 2 of the fair value hierarchy, independent pricing sources have been utilized. One price is provided per security based on observable market data. To ensure securities are appropriately classified in the fair value hierarchy, we review the pricing techniques and methodologies of the independent pricing sources and believe that their policies adequately consider market activity, either based on specific transactions for the issue valued or based on modeling of securities with similar credit quality, duration, yield and structure that were recently traded. A variety of inputs are utilized by the independent pricing sources including benchmark yields, reported trades, non-binding broker/dealer quotes, issuer spreads, two sided markets, benchmark securities, bids, offers and reference data including data published in market research publications. Inputs may be weighted differently for any security, and not all inputs are used for each security evaluation. Market indicators, industry and economic events are also considered. This information is evaluated using a multidimensional pricing model. Quality controls are performed by the independent pricing sources throughout this process, which include reviewing tolerance reports, trading information and data changes, and directional moves compared to market moves. This model combines all inputs to arrive at a value assigned to each security. In addition, on a quarterly basis, we perform quality controls over values received from the pricing sources which include reviewing tolerance reports, trading information and data changes, and directional moves compared to market moves. We have not made any adjustments to the prices obtained from the independent pricing sources.

Financial assets utilizing Level 3 inputs primarily include common stocks that can only be redeemed or sold at their par value and only to the security issuer and certain state premium tax credit investments.

ANNUAL STATEMENT FOR THE YEAR 2015 OF THE MORTGAGE GUARANTY INSURANCE CORPORATION

F. Subprime-Mortgage-Related Risk Exposure

(1) Subprime Mortgage Exposures

We are a direct writer of private mortgage guaranty insurance coverage on residential mortgage loans in the United States. We have exposure to insurance on subprime mortgages and we insure high loan-to-value (LTV) loans, adjustable rate mortgages (ARMs), interest-only loans and payment option ARMs which are viewed to have riskier characteristics, but do not necessarily meet our definition of subprime mortgage exposure.

The subprime exposure we write is affected by our underwriting guidelines that limit the risk factors associated with an insured loan and by higher premium rates on coverage. We believe that mortgage credit risk is materially affected by the following underwriting factors:

- the borrower’s credit strength, including the borrower’s credit history, debt-to-income ratios;
- cash reserves, the willingness of a borrower with sufficient resources to make mortgage payments when the mortgage balance exceeds the value of the home; and
- the loan product, which includes the LTV, the type of loan instrument (including whether the instrument provides for fixed or variable payments and the amortization schedule), the type of property, the purpose of the loan, and the borrower’s documentation for the loan.

Excluding other factors, claim incidence increases for loans with lower FICO credit scores compared to loans with higher FICO credit scores; for reduced documentation loans compared to loans with full underwriting documentation; during periods of economic contraction and housing price depreciation, including when these conditions may not be nationwide, compared to periods of economic expansion and housing price appreciation; for loans with higher LTV ratios compared to loans with lower LTV ratios; for adjustable rate mortgage loans during a prolonged period of rising interest rates compared to fixed rate loans in such a rate environment; for loans that permit the deferral of principal amortization compared to loans that require principal amortization with each monthly payment; for loans in which the original loan amount exceeds the conforming loan limit compared to loans below such limit; and for cash out refinance loans compared to rate and term refinance loans.

We classify primary loans as either “Reduced Doc” or not “Reduced Doc”. Reduced Doc are loans in which full documentation about the borrower’s income, assets and liabilities, employment or certain other financial matters is not provided. In accordance with industry practice, we classify loans approved by GSE and other automated underwriting (AU) systems under “doc waiver” programs that do not require verification of borrower income as “full doc.” Based in part on information provided by the GSEs, we estimate full doc loans of this type were approximately 4% of 2007 new insurance written. Information for other periods is not available. We understand these AU systems granted such doc waivers for loans they judged to have higher credit quality. We also understand that the GSEs terminated their “doc waiver” programs in the second half of 2008. Reduced documentation loans only appear in the reduced documentation category and do not appear in any of the other categories.

If a primary loan is not a Reduced Doc loan, it is classified by FICO credit score as either prime, A minus, or subprime. A borrower’s FICO credit score is determined as follows: if there are three FICO scores available, the middle FICO score is used; if two FICO scores are available, the lower of the two is used; if only one FICO score is available, it is used. For a loan with multiple borrowers, the lowest of the borrowers’ FICO credit scores is used. A prime loan is defined as a mortgage loan with a FICO credit score equal to or above 620. An A minus loan is defined as a mortgage loan with a FICO credit score greater than or equal to 575 but less than 620. A subprime loan is defined as a mortgage loan with a FICO credit score less than 575. We classify pool policies by FICO credit score as either prime, A minus, or subprime. The pool’s FICO credit score is determined by averaging the valid FICO scores of the loans within each policy.

(2) Direct exposure through investments in subprime mortgage loans – not applicable

(3) Direct exposure through other investments

Our primary source of investments with underlying subprime exposure is through investments in affiliated insurance companies. The remainder of our investments do not have significant exposure to subprime risks. We cede portions of our direct writings to subsidiaries, MRCW and MRCV, which, as a result, have exposure to our subprime risks.

The following is a summary of our other investments with subprime exposure:

\*Our subsidiaries MRCW and MRCV have underwriting exposure to subprime mortgage risk. These investments comprise 3.4% of our invested assets.

(4) Underwriting exposure to subprime mortgage risk through mortgage guaranty insurance coverage

Our private mortgage guaranty insurance business faces significant direct and indirect exposure to subprime mortgage risk. If the homeowner defaults, private mortgage insurance reduces and, in some instances, eliminates the loss to the insured lending institution. We have direct exposure in providing mortgage insurance coverage on subprime mortgage loans, and we have indirect exposure to the extent our insurance on other mortgage loans is affected by conditions in the housing and mortgage markets that result from the performance of subprime mortgages, whether or not insured under mortgage insurance coverage.

Our reserving process is not designed to segregate prime loan reserves from subprime loan reserves, as defined in this disclosure. However, we do capture losses paid for subprime loans.

Subprime net losses and net reserves according to our definitions described in 21.F.(1) were as follows:

|                                | Losses Paid in the<br>Current Year | Losses Incurred in the<br>Current Year | Case Reserves at End<br>of Current Period | IBNR Reserves at<br>End of Current<br>Period |

22. Events Subsequent

We have considered subsequent events through February 16, 2016.

On February 10, 2016, we borrowed \$155.0 million in the form of a fixed rate advance from the Federal Home Loan Bank of Chicago (the “Advance”). Interest on the Advance is payable monthly at an annual rate, fixed for the term of the Advance, of 1.91%. The principal of the Advance matures on February 10, 2023. We may prepay the Advance at any time. Such prepayment would be below par if interest rates have risen after the Advance was originated, or above par if interest rates have declined. The Advance is secured by eligible collateral whose market value must be maintained at 102% of the principal balance of the Advance. We provided eligible collateral from our investment portfolio. Additionally, with proceeds from the Advance, we purchased \$132.7 million par value of Investment’s 9% Debentures at a purchase price of \$150.7 million (plus accrued interest of \$4.3 million).

If recorded in this statement, the above transactions would have had the following effect:

- increase in admitted assets of \$150.7 million,
- increase in liabilities of \$155.0 million, and
- reduction to net income and policyholders’ surplus of \$4.3 million (without consideration of income taxes).

- D. Uncollectible Reinsurance - not applicable
- E. Commutation of Ceded Reinsurance
- During the third quarter of 2015, the April 2013 quota share reinsurance agreement was restructured via a commutation and new agreement. Under the terms of the new agreement, reinsurance premiums, ceding commission and profit commission are settled net on a quarterly basis. The reinsurance premium due after deducting the related ceding commission and profit commission is reported within Ceded Reinsurance Premiums Payable on the liability page of the balance sheet. For 2014, the profit commission accrued has been reported as an admitted write-in item on the asset page of the balance sheet.

We have reported in our operations in the current year as a result of commutation of reinsurance with the companies listed below, amounts that are reflected as:

|                                       |              |
|---------------------------------------|--------------|
| (1) Losses incurred                   | \$ 14,880    |
| (2) Loss adjustment expenses incurred | 120          |
| (3) Premiums earned                   | 11,432,372   |
| (4) Other                             | (11,146,000) |

| (5) Company                         | Amount  |
|-------------------------------------|---------|
| Alterra Reinsurance USA Inc.        | \$ -    |
| Everest Reinsurance Corporation     | -       |
| Partner Re Reinsurance Corporation  | -       |
| Renaissance Reinsurance Ltd.        | -       |
| Renaissance Re Specialty Risks Ltd. | -       |
| TransAtlantic Reinsurance Company   | -       |
| Third Point Reinsurance Company     | -       |
| ZinsureRE TCI, Ltd                  | 15,000  |
| National City                       | 286,372 |

In a commutation, the reinsurance agreement is cancelled, with no future premium ceded and funds for any incurred but unpaid losses transferred to us. The transferred funds result in an increase in our investment portfolio (including cash and cash equivalents) and a decrease in net losses paid (reduction in losses incurred). In addition, there is a decrease in the ceded loss reserves (increase in losses incurred), and thus there is minimal net impact to losses incurred. The above commutations resulted in a decrease to losses and lae paid of \$14,885,333.

25. Change in Incurred Losses and Loss Adjustment Expenses
- Reserves as of December 31, 2014 were \$1,973 million. As of December 31, 2015, \$695 million has been paid for incurred losses and loss adjustment expenses attributable to insured events of prior years. Reserves remaining for prior years are now \$1,199 million as a result of re-estimation of unpaid claims and claim adjustment expenses. Therefore, there has been a \$79 million favorable prior year development from December 31, 2014 to December 31, 2015. The decrease is generally the result of ongoing analysis of recent loss development trends. Original estimates are increased or decreased as additional information becomes known regarding individual claims. We do not adjust premiums based on past claim activity.
