Item 8.01 Other Events.

On June 9, 2009, MGIC Investment Corporation (the "Company," which term in this report refers to the parent company only) notified the lenders under its bank revolving credit facility that it will repay the entire \$200 million outstanding under the credit facility on June 12, 2009. Based on current LIBOR rates, the quarterly interest cost of the \$200 million outstanding under the credit facility (net of estimated interest income on the amount repaid) is approximately \$2.0 million. There are no defaults under the credit facility. The \$300 million credit facility is scheduled to mature on March 31, 2010. While the credit facility is in effect there is a facility fee, which on a quarterly basis is approximately \$0.5 million.

As of June 9, 2009, giving effect to the planned repayment of \$200 million under the credit facility, the Company had a total of approximately \$151 million in short-term investments. These investments are virtually all of the Company's liquid assets. As of June 9, 2009, the Company's obligations included approximately \$162 million of Senior Notes scheduled to mature in September 2011. On an annual basis, the Company's current use of funds for interest payments on these Senior Notes and on its Senior Notes due in 2015 approximates \$25 million. See the Company's Quarterly Report on Form 10-Q for the quarter ended March 31, 2009 for more information regarding the Company's assets and liabilities, including information about Company's junior convertible debentures and the Company's election to defer payment of interest on them that was scheduled to be paid April 1, 2009.
